WOW
WORLDS OF WONDER

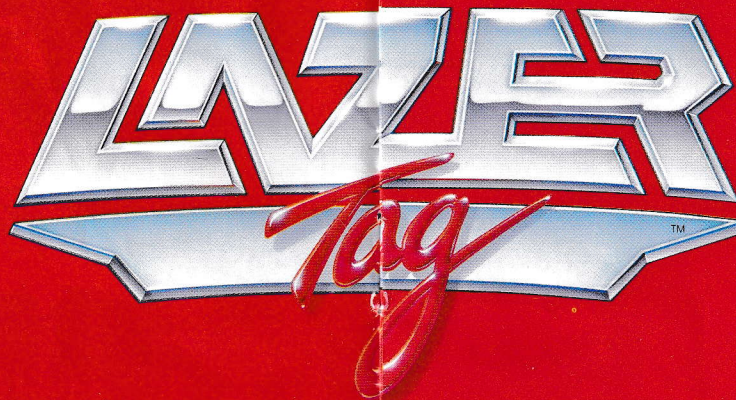

Welcome to the year 3010.

Lazer Tag is the international sport. Each year, grand Lazer Tag championship games are held across a variety of age groups. The Lazer Tag games are coordinated by The Lazer Tag Academy, a prestigious international foundation devoted to the continued peace, prosperity, and advancement of mankind.

Jamie Jaren is a bright, friendly thirteen-year-old girl and three-time winner of the Trans-Global Lazer Tag championships.

Jamie is the star pupil of professor Nori Olanga, head of the StarLyte Academy.

Professor Olanga has discovered that Jamie possesses a curious power over the energy emitted from the Lazer Tag StarLyte unit. Jamie can

Lazer Tag: The Story

use StarLyte energy to manipulate the physical world as well as travel through time.

But then Draxon Drear arrives, a master criminal from the past.

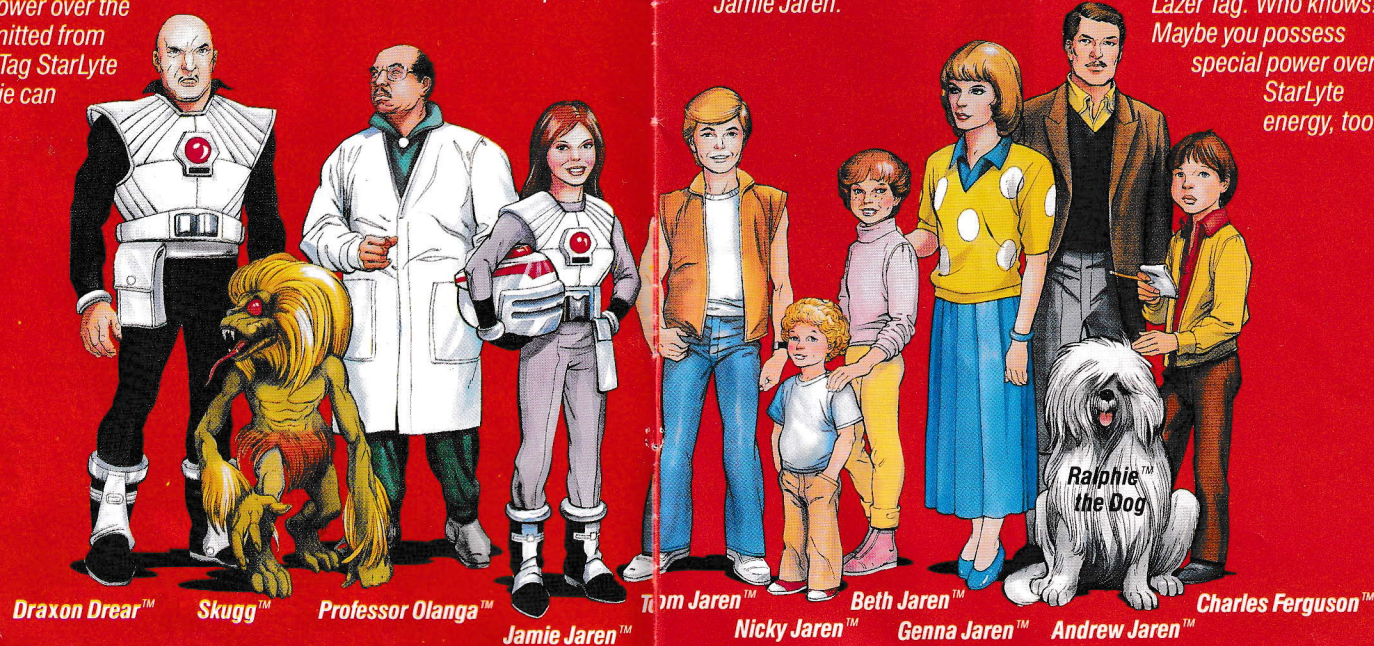

Drear plans to change the world into an evil place and he, too, has power over StarLyte energy. The only person who can thwart Drear's evil plan is Jamie Jaren.

Drear decides to travel to the year 1987 to kidnap Jamie's ancestor, Tom Jaren. Tom is a 14-year-old athletic boy living in Los Angeles. Drear reasons that by changing history, Jamie Jaren will never be born and no one will be able to stop Drear.

Jamie discovers this evil plot and she, too, travels to 1987 to protect her relatives: Tom, his sister Beth and his brother Nicky Jaren.

Join Jamie, Tom, Beth, and Nicky on Saturdays on NBC this Fall as they travel through time to stop the evil Draxon Drear. Every Saturday you'll see a new adventure and learn more about

the game of the future, Lazer Tag. Who knows? Maybe you possess special power over StarLyte energy, too.

Lazer Tag: The Game

Lazer Tag is the ultimate sport from the year 3010. Now you can play this futuristic game of tag in your own backyard.

Lazer Tag is based on a simple concept. Tag your opponent six times before he gets you! The game has endless variations—you are limited only by your imagination.

◆ *Single players can practice accuracy!*

For one person:

Practice your accuracy! Adjust the StarLyte beam so that it is narrow. Then use the StarLyte for challenging target practice! Place the StarSensor upright on a flat surface and stand up to 100 feet away. The farther away from the StarSensor you are,

◆ *Great for play with two players!*

the more difficult it will be to tag it. Practice scoring tags by aiming your StarLyte at the red dome of the StarSensor.

For two persons:

With two players, you are ready to play Lazer Tag! The most simple version of Lazer Tag is to try to tag your opponent 6 times before he gets you.

Aim your StarLyte at your opponent's StarSensor. If your aim is good and the StarLyte beam connects with the red dome of the StarSensor, you'll tag your opponent!

Control the accuracy required to play the game by adjusting the light beam switch under the barrel. Set the light beam width narrow for sharpshooting or wide for easier tagging of moving targets.

StarLyte™

- ◆ Sleek, smooth design for easy handling
- ◆ Electronic sighting scope
- ◆ Light beam adjuster—allows for variable beam diameters for game or target play
- ◆ On/Off switch for lazer-like sound effects
- ◆ Red pinstripe detail glows when energized

Lazer Tag: Game Kit

StarSensor™

StarBelt™

StarLyte™

StarSensor™

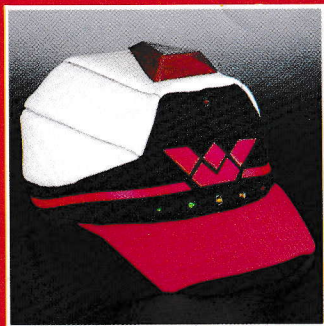

- ◆ Score-keeping LED lights successively illuminate with each tag
- ◆ Computerized sound effects register each tag
- ◆ Scanning LEDs illuminate for nighttime play
- ◆ Computerized heartbeat sound accelerates with each tag
- ◆ Siren-like sound effects and flashing LEDs announce the game-winning tag

StarBelt™

- ◆ Durable, comfortable design
- ◆ Securely holds one StarSensor
- ◆ Fully adjustable for ages 7 and older
- ◆ Comes with holster, adjustable for left or right hand
- ◆ Comes with removeable colored stripes for team identification

Look for the specially designed Lazer Tag accessories to increase the thrill and fun of the game of the future.

StarCap™

- ◆ Blinking LED to indicate power-on
- ◆ Dome sensor accurately positioned to detect tags from any direction
- ◆ Score-keeping LED lights successively illuminate with each tag
- ◆ Computerized sound effects register each tag
- ◆ Siren-like sound effects and flashing LEDs announce the game winning tag

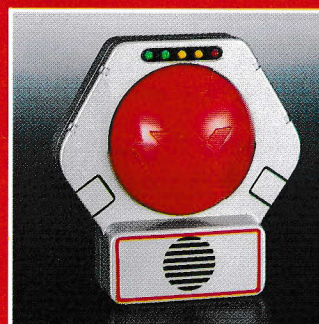

Lazer Tag. The Gear

StarVest™

- ◆ Stylish, futuristic design
- ◆ Designed to securely hold one Lazer Tag StarSensor™ (sold separately)
- ◆ Fully adjustable for ages 7 and older
- ◆ Made of rugged material
- ◆ Colored stripes can be changed for team play

StarSensor™

- ◆ Sold separately as an extra target for extra fun
- ◆ Comes with velcro strip to attach to any surface

StarHelmet™

- ◆ On/Off power switch
- ◆ Dome sensor accurately positioned to detect tags from any direction
- ◆ Score-keeping LED lights successively illuminate with each tag
- ◆ Computerized sound effects register each tag
- ◆ Scanning LEDs illuminate for nighttime play
- ◆ Computerized heartbeat sound accelerates with each tag
- ◆ Siren-like sound effects and flashing LEDs announce the game winning tag
